

RCT - Modular Cooling Tower with superior maintenance features

Applications Flexibility

Commercial applications

With an ever increasing focus on operational reliability and ease of maintenance it is paramount that cooling towers are also easy to inspect, clean and maintain. The RCT cooling tower responds to these requirements thanks to its unique design features.

Industrial applications

The RCT cooling towers provide optional solutions to these by reducing cost of plant design, construction, operation and on-going maintenance whilst exceeding the standard of quality and construction demanded by industry.

Advantages

- Low installation costs due to low shipping weights and modular shipping options.
- Layout flexibility: single or multiplexed configurations.
- Low sound emission due to high efficiency low noise axial fans.
- Structural integrity and long life due to superior pultruded composite construction.
- Operational safety due to superior maintenance and cleaning possibilities, including low height for ease of access to all components.

Baltimore Aircoil

Focus on Superior Maintenance Features

- 1 Access to fill section
- 2 Basin access from all sides
- 3 Easy access to float valve for adjustment
- 4 Removable fill for cleaning
- 5 Easily removable spray system
- 6 Removable high efficiency eliminators
- 7 Motor outside airstream
- 8 Easy access to drives
- 9 Smooth interior surfaces
